Purpose of the Addendum

This Addendum is made in accordance with the requirements of the Occupational Pension Schemes (Investment and Disclosure) (Amendment) Regulations 2019 and it updates the Statement of Investment Principles to record how the Scheme complies with the EU Shareholder Rights Directive (SRD II) which comes into effect on 1 October 2020.
Investment Manager Arrangements

As the Scheme’s assets are held in pooled funds, the Trustees have limited influence over the investment managers’ investment decisions. In practice, investment managers cannot fully align their strategy and decisions to the (potentially conflicting) policies of all their pooled fund investors in relation to strategy, long-term performance of debt/equity issuers, engagement and portfolio turnover.

It is therefore the Trustees’ responsibility to ensure that the approaches adopted by investment managers are consistent with the Trustees’ policies before any new appointment, and to monitor and to consider terminating any existing arrangements that appear to be investing contrary to those policies.

The Trustees expect investment managers, where appropriate, to make decisions based on assessments of the longer term financial and non-financial performance of debt/equity issuers, and to engage with issuers to improve their performance. The Trustees assess this when selecting and monitoring managers.

The Trustees’ policy on selecting, monitoring, evaluating and (where necessary) terminating these arrangements is set out in further detail below.

Compatibility of Pooled Funds with the Trustees’ Investment Strategy

When selecting a pooled fund, the Trustees consider various factors, including:

- the assets that will be held within that fund and whether the asset allocation of the fund is expected to change over time;
- the risks associated with the fund along with the return that is expected;
- the fund’s objective (as stated by the fund’s investment manager) and whether the objective is consistent with the performance that the Trustees expect from that fund;
- the fund’s fee structure to ensure that this is reasonable and that it does not provide an incentive for the investment manager to manage the fund in a way that differs from the expectations of the Trustees;
- how frequently underlying investments within the fund are expected to be traded by the investment manager;
- how financially material considerations (including ESG factors) over the appropriate time horizon are taken into account by the investment manager;
- the investment manager’s policy in relation to the exercise of the rights (including voting rights) attaching to the investments held within the pooled fund; and
- the investment manager’s policy in relation to undertaking engagement activities in respect of the investments held within the pooled fund*.
Investment Manager Arrangements (continued)

*This includes engaging with an issuer of debt or equity regarding matters including (but not limited to) performance, strategy, capital structure, management of actual or potential conflicts of interest, risks, and ESG matters. It also includes engaging on these matters with other investment managers, other holders of debt or equity and persons or groups of persons who have an interest in the issuer of debt or equity.

After analysing the above characteristics for a fund, the Trustees identify how that fund would fit within their overall investment strategy for the Scheme and how the fund is expected to help the Trustees meet their investment objectives.

Duration of Investment Manager Arrangements

The Trustees normally expect that pooled funds will be held for several years.

However, as part of the periodic strategic asset allocation reviews (which take place at least every three years), the Trustees will review whether the ongoing use of each fund remains consistent with their investment strategy.

The Trustees regularly monitor the financial and non-financial performance of the pooled funds held and details of this monitoring process is set out below. If the Trustees become concerned about the ongoing suitability of a pooled fund, they may reduce exposure to it or disinvest entirely. Such action is expected to be infrequent.

Monitoring Pooled Funds

The Trustees regularly assess the performance of each fund held and this monitoring includes an assessment of whether the investment manager continues to operate the fund in a manner that is consistent with the factors used by the Trustees to select the fund (as listed above).

When assessing the performance of a fund, the Trustees do not usually place too much emphasis on short-term performance although they will seek to ensure that reasons for short-term performance (whether favourable or unfavourable) are understood.

The Trustees expect the investment managers of pooled funds to invest for the medium to long term and they expect investment managers to engage with issuers of debt or equity with a view to improving performance over this time frame.

If it is identified that a fund is not being operated in a manner consistent with the factors used by the Trustees to select the fund, or that the investment manager is not engaging with issuers of debt or equity, the Trustees may look to replace that fund. However, in the first instance, the Trustees would normally expect their investment adviser to raise the Trustees’ concerns with the investment manager. Thereafter, the Trustees, in conjunction with their investment adviser, would monitor the performance of the fund to assess whether the situation improves.
Investment Manager Arrangements (continued)

Portfolio Turnover

The Trustees are aware of the requirement to monitor portfolio turnover costs (the costs incurred as a result of the buying, selling, lending or borrowing of investments).

When selecting a pooled fund, the Trustees will consider how the investment manager defines and measures:

- the targeted portfolio turnover (the frequency within which the assets of the fund are expected to be bought or sold); and

- turnover range (the minimum and maximum frequency within which the assets of the fund are expected to be bought or sold).

At least annually, the Trustees, in conjunction with their investment adviser, will consider the transaction costs incurred on each pooled fund. As part of this analysis, the Trustees will consider whether the incurred turnover costs have been in line with expectations.

The Trustees will take the above information on portfolio turnover into account when assessing the ongoing suitability of each pooled fund.
